

Since the Supreme Court's recent ruling in *Dobbs*, Democrats have aggressively worked to force on Americans an extreme agenda of abortion until birth, for any reason, paid for by the taxpayer.

Legislation to Force Abortion on America:

The priority Democratic abortion bill, the Women's Health Protection Act, more accurately described as the Abortion on Demand Until Birth Act, would overturn state and federal pro-life laws that were upheld by the courts under *Roe* and would block future commonsense pro-life laws. The bill mandates:

- Painful abortion in the second and third trimester right up until the moment of birth.
- Painful dismemberment abortion techniques.
- Do-it-yourself abortion by mail without seeing a doctor.
- Discriminatory abortions based on disability, gender, or race.
- Prohibitions on health and safety regulations for abortion facilities.
- Prohibitions on informed consent, parental involvement, and waiting periods before an abortion.

Their abortion-above-all agenda doesn't stop there. They have also moved legislation that would:

- Shield criminal abusers from transporting children across state lines for abortion without parental consent.
- Enable rogue late-term abortionists to initiate abortions in states where such procedures are now prohibited.
- Funnel money to abortion providers, and more.

Their goal is to gain seats in the Senate, remove the 60-vote filibuster requirement, and pass the Women's Health Protection Act with a mere simple majority. If they are successful, they will impose abortion on demand throughout pregnancy on all fifty states.

Abortion Funding

The Hyde family of amendments in appropriations bills, long supported by strong bipartisan majorities, prohibit abortion funding at home and abroad and protect the consciences of health care providers.

The president's budget and Democrats in Congress eliminated all legacy pro-life riders from their funding bills and they continue to look for ways to sneak in abortion funding.

Only Republicans and the filibuster stand in the way of their success.

Biden-Harris Administration

The Biden-Harris administration is systematically dismantling life-affirming policies of the Trump administration and replacing them with an aggressive pro-abortion agenda – even creating an intra-agency “Reproductive Healthcare Access Task Force” to insert abortion into every aspect of the administration. The Biden-Harris administration

- Has implemented policies to fund the abortion industry overseas and at home.
- Are rolling back safety protocols for dangerous chemical abortion.
- Are using veterans' hospitals for illegal abortions.
- Are distorting longstanding federal laws to override pro-life state laws and impose abortion on Catholic hospitals.
